

a revolutionary orthosis

Sit & feel free!

Are you 'tired' of your sitting problems? Does the wheelchair provide insufficient comfort and do you have complaints? Lewis offers a patented solution. This makes using the wheelchair more pleasant and increases the client's quality of life.

Any existing wheelchair can be quickly and effectively customised whereby the period of pain and discomfort is often permanently ended! Feel free and energetic by way of a good posture and personally customized sitting orthosis.

Together

The Lewis team combines knowledge and experience to work together with the dealer, adviser, therapist and client to achieve the best possible result.

Together we go for Lewis.

Erna Sanders, thoracic spinal cord lesion

*“It actually felt fine immediately,
the stabbing pain in my back is gone and
I no longer need to go to bed in the afternoon due to tiredness.”*

For whom is Lewis suitable?

A Lewis is suitable for young and old, large and small. For anyone who is in a wheelchair, has various sitting-related problems, and for which the existing wheelchair offers no possibility of improvement. The sitting orthosis is applied where conditions have existed from an early age or where they have emerged later in life. Examples of sitting-related problems are: pain in the back, shoulders, neck, or the bottom or even pressure ulcers. Consider also issues such as fatigue, slouching, and tilting to the left/right with imbalanced growth and scoliosis as possible consequence.

The formation of scoliosis is irreversible, thus:

Prevention is essential, as cure is impossible.

Solution

The Lewis solution is based on a vision that offers the body optimal posture and support for situations where active functioning and communication are central. In many situations the Lewis sitting orthosis offers an acceptable solution.

For very severe structural deformation of the body a conventional orthosis may be a better solution. Also, when active functioning and/or communication are not a reality, alternative solutions may be more suitable.

Myrthe van Wingerden, spina bifida

*“My back feels more relaxed,
I feel a lot better in myself, I have more stamina
and I’m basically sitting more comfortably.”*

Nicky Fontaine, spastic quadriplegia

*“The back pain is over, I’m sitting up much straighter and I can move easily.
Now that I am used to it, it feels really good.”*

Advantages for the client

- Effective solution to the sitting-problem
- Increased freedom of movement, more energy
- Improved quality of life due to better comfort
- Less stigmatizing
- More space for stomach contents
- Easier breathing
- Fitting is easier for client
- Short delivery time
- Within two hours the sitting orthosis is installed, individually customized and ready for use

Benefits for the healthcare professional

Effective

- Effective approach via a fixed protocol
- Measurable result by SMS measurement report
- Transparency of approach and clear explanation of underlying principles
- Total solution due to large range

Cost-Saving

- **No cure no pay**, sitting-guarantee ensures zero financial risk
- Proven cost savings in healthcare
- Is installed in new or existing wheelchair

Fast

- The sitting orthosis is delivered during the first visit
- No fitting phase and short installation time, minimum disruption to the client as a result of (often) continued availability of their wheelchair
- Short delivery time due to standard range; stock available

We come to you,
orders are delivered personally by a professional,
in this way we are able to guarantee quality

Our work method

Lewis provides clear advice without obligation. Do you have questions? Please feel free to contact us. Our work process has three phases:

Preparation

The seating system is specified and assembled depending on the type of wheelchair, body measurements and possible sitting problems. On the basis of a completed intake form a suitable seating system is assembled from the standard range (see our product portfolio). In the interest of the client, the delivery takes place as soon as possible.

Delivery

The delivery takes place on location (at the client's home or at the dealer). The seating system is mounted in the existing wheelchair and the system as a whole is tailored to the individual client. Lewis guarantees the sitting quality provided that the AVeS-guidelines are applied. *To measure is to know.* The sitting quality is objectively assessed in the SMS Sitting advice measurement report. This report verifies whether the client is actually seated correctly according to the AVeS-guidelines.

Aftercare

After a short settling-in period the original complaints should ease. Contact us immediately if new problems have arisen. The client's welfare is paramount. If there are questions or requests after delivery then Lewis does its very best to help with these. If we hear nothing then no news is good news.

What about the cost?

A Lewis sitting orthosis is an affordable solution for everyone. For more information please contact your medical advisor.

Sitting-guarantee

By means of a three month sitting-guarantee, for the best possible sitting quality security is offered. If questions or problems arise within this period, they are solved to the best of our ability by Lewis. Lewis gives a sitting-guarantee only in combination with a SMS sitting advice measurement report. If the client is not satisfied with the result achieved the old sitting facilities are reinstated and all incurred costs are re-credited.

No cure no pay.

Lewis guarantees a high-quality product; the technical guarantee is valid for twelve months (see the general warranty provisions).

Josefien Burink-Lempsink, senescence and hip luxation

***“I would recommend it to everyone who has back problems,
I can sit in this chair for longer than in any other.
I’m very happy with this chair.”***

About us

We want our clients to be able to sit free of pain and feeling happy. That is why we take the necessary time and put in the extra effort. We are available for questions.
